

Transform Your Space

**Adaptable Spaces and Beds
for Complex Needs**

A History of Innovation

About Us

At Safespaces, we have over 20 years of experience in the design, manufacture and installation of adaptable spaces and beds.

We offer a range of innovative products designed to improve safety and provide a sensory-friendly environment.

Our specialist products are suitable for people with complex needs including autism, learning difficulties, epilepsy and dementia. They are used in a wide range of settings including family homes, schools, hospitals, care and respite settings throughout the UK and worldwide.

Why Choose Us

- Tailored to meet complex needs
- Manufactured in the UK
- All products are class 1 medical devices
- Compliant with MHRA Medical Device Regulations
- Virtual demonstrations and assessments
- Expert support and guidance
- Trusted for over 20 years

Our 5-Step Process

1

We work closely with families, carers, and professionals to offer a comprehensive wrap-around service.

Our expert team is always on hand to provide guidance and support throughout our 5-step process.

Contact Us

2

Upon your initial enquiry, we will conduct a ‘fact find’ to gain an understanding of the individual’s conditions and behaviours including their mobility, behaviours, sleep patterns, and the intended use of the product.

Assessment & Product Design

3

A virtual assessment will be arranged with our Product Advisors, who will provide a product demonstration and discuss how the product can be tailored to best meet the individual’s needs.

Funding Advice

4

There are many funding options available to help families access essential equipment – in 2023 92% of our products were fully funded. We can provide information on the best options and support you with the application process.

Manufacture & Installation

5

Our products are manufactured and carefully hand-crafted in the UK. We have a team of experienced technicians who deliver and install our products in family homes, schools, hospitals, care and respite settings.

Our Impact

We are committed to supporting our customers throughout their journey with us and we pro-actively collate feedback.

The responses we receive provide an evidence base detailing the real world impact of the products for users, their families and carers.

Promoted Independence and Privacy

“My daughter has for the first time managed to sleep through the night without medication – it is amazing. She also is no longer banging all night and she is so much more relaxed.”

“Our boy is safe at night and loves going to sleep now. His settling has improved which has reduced stress on us all.”

“The Safespace has been invaluable to us as a family. Going to bed knowing Frankie is safe to roll around, move in his sleep and cannot come to any harm has been significant in both his and our ability to have a better night’s sleep.”

Safespace

A soft, flexible sleep and relaxation space

- Safe, strong and durable
- Flexible sides and soft padded floor to prevent injury
- Calming low stimulation environment
- Easily transformed into a sensory space

The Safespace offers flexible sides and a soft padded floor, providing a comfortable and safe environment that reduces the risk of injury from hard surfaces, providing peace of mind for parents and carers.

Who Is It Suitable For?

The Safespace is designed for adults and children with complex needs including autism, learning difficulties, epilepsy, and behaviours of concern. This can include those with self-injurious behaviours such as head banging or those that seek sensory feedback from hard surfaces.

Sleep

Play

Sensory

Behaviour

Key Benefits

Improve Sleep Patterns

The Safespace is ideal for bedtime use as it provides a low sensory space that minimises stimulation helping the user to settle and sleep for longer periods. It also provides a safe environment for those who continue to wake at night.

Meet Sensory Needs

For individuals who seek out sensory stimulation, the Safespace provides the perfect sensory retreat. A wide range of sensory equipment can be used including fibre optics, projections and play shapes to transform the Safespace.

Support Behaviour Self-management

A Safespace provides a private space in which an individual can retreat when feeling stressed, allowing time to de-escalate in a safe environment. This personal space can support the development of behaviour self-management.

Design Options and Size

Your Safespace can be tailored to meet complex needs.

- Size
- Colours
- Doors
- Windows
- Flooring
- Mattress
- Water resistant seams
- Tube holes
- Zip access for equipment
- White wall for projecting
- Visual Deterrent Panels (VDPs)

Safespaces are available in a range of sizes from a single bed up to 2.5m x 2.5m.

A minimum clearance of 25cm is required from the product walls to any hard surface at all times.

Safespace Hi-Lo

Height adjustable Safespace

- Soft, flexible sides to prevent injury and a mesh ceiling
- Safe, low stimulation environment ideal for sleep
- Height adjustable platform for carers

The Safespace Hi-Lo offers a comfortable and adaptable sleep environment ideal for individuals who require personal or nursing care.

Who Is It Suitable For?

The Safespace Hi-Lo is designed for adults and children with complex needs and limited mobility. It is ideal for those who may demonstrate strong or self-injurious behaviours.

Cosyfit

A robust high-sided sleep and relaxation area

- Soft padded and flexible sides to prevent injury
- Low stimulation environment ideal for sleep
- Modular design to meet changing needs

The Cosyfit provides a safe environment in which someone can sleep, relax or engage with sensory equipment. It offers a combination of soft padded and flexible sides making it ideal for individuals who may be at risk of falling or hurting themselves on hard bed surrounds.

Who Is It Suitable For?

The Cosyfit is designed for adults and children with limited mobility and complex needs including autism, epilepsy, learning difficulties and behaviours of concern.

Modular Design

The Cosyfit is an extremely flexible product, offering a range of options including various heights, widths, and platforms, making it ideal for changing needs.

Cosyfit

The Cosyfit sits directly on the floor for maximum stability, making it ideal for individuals with robust behaviours.

Cosyfit Platform

The Cosyfit Platform is raised off the floor at a fixed height, making it ideal for individuals who require a hoist.

Cosyfit Hi-Lo

The Cosyfit Hi-Lo provides the flexibility of a height-adjustable platform, offering a comfortable working height for caregivers.

Cosyfit Hi-Lo Profiling

The Cosyfit Hi-Lo Profiling offers backrest, knee break, and Trendelenburg functions on a height-adjustable platform, supporting many aspects of nursing care.

Siesta

A versatile, strong and comfortable high-sided bed

- Soft, flexible sides to prevent injury
- Safe, low stimulation environment ideal for sleep
- Versatile to meet a wide range of needs

The Siesta provides a safe, low stimulation environment in which someone can sleep without the risk falling or hurting themselves on hard bed surrounds. It has a fixed height platform making it ideal for individuals who require a hoist.

“We use the Siesta a great deal of the time now. It has prevented a number of safety incidents for us”

Height: 138.5cm

A minimum clearance of 30cm is required from the product walls to any hard surface at all times.

Funding

92% of Safespaces products were fully funded in 2023.

There are many funding options available to help families access essential equipment. Our products are most commonly funded by the Disabled Facilities Grant (DFG), local authorities, community equipment providers and charities. We can provide information on the best options and support you through the process.

How Much Are Our Products?

Our products are tailored to suit the individual needs of our users. We offer virtual product assessments to help us fully understand the user’s requirements and suitability. Our expert Product Advisors can provide a product demonstration and discuss in detail how the product can be designed to best meet the user’s needs. Following an assessment, we will design your product and provide an itemised quotation.

Are Our Products Compliant?

As a manufacturer of class 1 medical devices, quality and compliance is at the heart of our business. Our products are fully compliant with the MHRA Medical Device Regulations (MDR). These stringent regulatory requirements require us to meet high quality standards and undergo rigorous product testing. We can provide further technical information upon request.

We follow the British Healthcare Trades Association’s (BHTA) Code of Practice approved by the Chartered Trading Standards Institute which safeguards the interests of all customers.

Our Services

We offer a range of additional services including

- Product Moves
- Rental Options
- Cleaning Services
- Maintenance Packages

“The installation went well and the technicians were friendly and helpful in showing us how to use the bed. We have found the product amazing! We have never had so much sleep, sometimes 12–13 hours. Since having the bed installed, my son’s sleep has improved, he is safer and I do not need to get up at night anymore because he can now settle himself. We are happy and feel reassured. It has been a life changer and we are happy to be finally getting some sleep.”

Laura Selby
